INSTALLATION INSTRUCTIONS FOR THE WINDTUNNEL EXHAUST FAN

READ AND SAVE THESE INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

With the use of any electrical appliance, it is important to observe all basic precautions to minimize the risk associated with use, such as electrical shock, fire, or injury to persons. If this unit is installed in a bathroom or kitchen, power must be supplied from a ground fault circuit interrupter (GFCI). Read these instructions before using your WindTunnel fan.

NEVER EXPOSE YOUR WINDTUNNEL FAN TO TEMPERATURES OVER 140°F (60°C)

INSTALLATION
1. Install mounting brackets to fan. (Refer to Figure 1)
2. Secure mounting brackets to a fixed structure. (Refer to Figure 2)
3. Connect the WindTunnel to venting system.
4. Connect to power source.

CAUTION: Before carrying out any maintenance or servicing, ensure the unit is disconnected from the main supply. FOR GENERAL VENTILATION USE ONLY. DO NOT USE TO EXHAUST HAZARDOUS OR EXPLOSIVE MATERIALS AND VAPORS OR DUST. Use supply wires suitable for 105°C.

WARNING - TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

a) Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer.
b) Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device such as a tag to the service panel.
c) Installation work and electrical wiring must be done by a qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction.
d) When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
e) Ducted fans must always be vented to the outdoors.
f) If this unit is to be installed over a tub or shower, it must be marked appropriately for the application and be connected to a GFCI (Ground Fault Circuit Interrupter) protected branch circuit.
g) NEVER place a switch where it can be reached from a tub or shower.
h) When installed above a bathtub or shower, install exhaust side of the fan facing an unoccupied area.
i) When used in an attic install exhaust side of the fan facing an unoccupied space.
j) To reduce the risk of electric shock do not expose to water or rain.
k) This unit has an unguarded impeller. Do not use in locations readily accessible to people or animals.
l) Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent back drafting. Follow the heating equipment manufacturer's guidelines and be connected to a GFCI (Ground Fault Circuit Interrupter) protected branch circuit.
m) NEVER expose this unit to water or rain.

Electrical Connections
1. Remove the screws from the electrical box cover plate.
2. Install the appropriate size strain relief in knock-out provided on the side of the electrical box.
3. Run the incoming power through the strain relief and knockout.
4. Connect the incoming power according to the wiring diagram. (Refer to Figure 3)
5. Secure the strain relief and reattach the electrical box cover. The fan is now ready for use.

TOOLS NEEDED:

1. Phillips screwdriver
2. 1/8” hex wrench
3. 1/4” hex wrench
4. #8 screws

MOUNTING HARDWARE INCLUDED

- Model SW604 & 106
  - Qty.4 #6 x 1/2" Machine Screw
  - Qty.4 #6 Washer
  - Qty.4 Rubber Washer
  - Qty.4 Mounting Bracket
  - Qty.1 #6 Screws For Securing Duct Connection

- Model SW608
  - Qty.4 #6 x 1/2" Machine Screw
  - Qty.4 #6 Washer
  - Qty.4 Rubber Washer
  - Qty.4 Mounting Bracket

FIGURE 1: MOUNTING BRACKETS

- Rubber washer must be placed between bracket and housing.

ELECTRICAL CONNECTIONS

MAINTENANCE

Inspect the product at least once every 12 months for excessive dust and dirt build up on the impeller (more often in dusty environments). Clean as necessary. The unit must be disconnected from power during inspection and/or cleaning.

FIVE YEAR LIMITED WARRANTY

Subject to the following limitations, Sunleaves (manufacturer) warrants that the WindTunnel exhaust fan will, for 5 (five) years from date of original purchase, remain free from appearance of defects in workmanship or materials. This warranty is subject to the following limitations: (a) manufacturer’s liability is limited to the replacement or repair of the unit, as decided by the manufacturer; (b) a defective unit must be returned, prepaid, with proof of purchase, to Sunleaves; and (c) this warranty does not apply to defects resulting from the alteration, abuse, accidental damage, unauthorized repair, or misuse of the unit. This warranty is given in lieu of all other warranties, guarantees, and conditions on manufacturer’s part, and the manufacturer shall have no tortious or other liability in respect to this WindTunnel exhaust fan. To obtain warranty service, return the fan to the place of purchase in accordance with store policy, or to Sunleaves Garden Products within the guidelines of the Return Authorization Process. The Return Authorization Process will be outlined for you when you contact Sunleaves Garden Products at the phone number or email address below.
